

SUMMARY

D. Andrica and O.L. Chender – <i>The determinant formulae for the Rodrigues general problem when the eigenvalues have double multiplicity</i>	1
Sedat İlhan – <i>On a Family of Telescopic Numerical Semigroups</i>	13
T. Khan, M. Danish Siddiqi, O. Bahadir, M. Ahmad – <i>Quasi Hemi-Slant Submanifolds of Quasi-Sasakian Manifolds</i>	19
S.W. Khan– <i>A study of unified integrals involving generalized Mittag-Leffler function(GMLF)</i>	37
Sivakami R, Kaliraj K, Vernold Vivin J – <i>On Star Coloring of Lexicographic Product of Graphs</i>	49
Nacima Memić and Sead Peco – <i>Mahler coefficients of the 2-adic shift</i>	61
A. Yadav, B. Pal– <i>On Relatively Normal-Slant Helices and Isophotic Curves</i>	69
R. Shamoyan and O. Mihić – <i>On some new sharp representation theorems for large spaces of subharmonic functions</i>	81
Amit Soni, Asena Çetinkaya – <i>Sharp bounds of Fekete-Szegő functional for quasi-subordination class involving q-calculus</i>	97
Om Ahuja, Sushil Kumar, Asena Çetinkaya – <i>Normalized Multivalent functions connected with generalized Mittag-Leffler Functions</i>	111
